Blitar, Jawa Timur

Fullstack Developer with 2 years of experience building scalable web applications using Laravel, React, Node.js, MySQL, and MongoDB. Capable of creating reliable and efficient systems to meet business needs, while focusing on end-to-end solutions that are user-friendly and high-performing. Passionate about solving complex problems and continuously learning new technologies to improve development efficiency.

Work Experience

Politeknik Negeri Malang (Project-Based) - Kota Malang, Jawa Timur Jan 2026 - March 2026

- Developed FinSight, a full-stack personal finance web application built using the MERN Stack, which enables users to track income, expenses, budgeting, and financial analysis through an interactive dashboard
- Building a Machine Learning-based expense forecasting feature that analyzes historical transaction data to predict future monthly expenses, helping users make data-driven financial decisions

Politeknik Negeri Malang (Project-Based) - Kota Malang, Jawa Timur Jul 2025 - Dec 2025

- Redesigned the UI/UX of bebras.or.id using Figma, creating a more modern interface and improving user experience and content navigation
- Implemented Laravel and Tailwind CSS to develop a responsive website, enhancing performance and ensuring seamless cross-device accessibility (desktop and mobile)

CV. AGSATU (Internship) - Kediri, Jawa Timur Jul 2024 - Dec 2024

- Developed a Laravel-based chili monitoring system to replace manual Excel tracking, significantly improving field survey input efficiency
- Built survey data features (tonnage, price, location) to enhance data accuracy and accessibility for analysis.
- Implemented interactive dashboards to visualize chili distribution trends (daily, monthly, yearly), supporting data-driven insights
- Added daily report export functionality, streamlining field documentation and improving survey agent productivity

PT. Surabaya Autocomp Indonesia (Internship) - Mojokerto, Jawa Timur Jan 2024 - Jul 2024

- Developed a Laravel-based clinic information system to replace Excel-based processes, managing data for 6,000+ employees and reducing data entry time by 50%
- Built treatment and consultation features to systematically record diagnoses and medications, reducing the risk of medical record errors
- Implemented real-time visit tracking, enabling faster health monitoring and improving follow-up efficiency for employee care

Education

State Polytechnic of Malang - Malang, Jawa Timur 2021 - 2025

Diploma IV Informatics Engineering, 3.67/4.00

- Thesis : Researching and developing a gamification-based educational web application to enhance elementary school students' computational thinking skills. The research findings indicate a significant improvement in the experimental group's learning outcomes of approximately 24%, as determined by non-parametric statistical tests

Organization Experience

UKM Usaha Mahasiswa (UKM USMA) - State Polytechnic of Malang Nov 2021 - Dec 2023

Staff - Organizing Committee

- Contributed to the creation of promotional materials and visual branding for student organization events, helping improve engagement and event visibility
- Collaborated with event and publication teams to deliver consistent and effective promotional campaigns across multiple platforms
